SQL架构 >

The `Employee` table holds all employees including their managers. Every employee has an Id, and there is also a column for the manager Id.

Id	Name	Department	ManagerId
101	John	A	null
102	Dan	A	101
103	James	A	101
104	Amy	A	101
105	Anne	A	101

Id	Name	Department	ManagerId
101	John	A	null

Note:
No one would report to himself.

隐藏提示1

Try to get all the mangerIDs that have count bigger than 5

隐藏提示2

Use the last hint's result as a table and do join with origin table at id equals to managerId

隐藏提示3

This is a very good example to show the performance of SQL code. Try to work out other solutions and you may be surprised by running time
